Blood Glucose Test Strip Instructions

Intended Use

These Blood Glucose test strips are plasma referenced and intended to be used with the EASYMAX® Blood Glucose monitor. This system is intended to be used on neonates, the fingertip, palm and forearm. Testing is done outside the body (during steady-state blood glucose concentrations).

Warning before using for the first time the strips of the blood glucose test strip batch

1. Make sure the strip is within the expiration date.
2. Do NOT freeze. Keep out of direct sunlight and heat.
3. Consult with your healthcare professional before you test palm or forearm.
4. Extreme humidity may affect the results. A relative humidity greater than 60% may cause lower results.
5. DO NOT use the test strips. The test strips are intended for single use only.
6. DO NOT reuse the test strips. The test strips are intended for single use only.
7. Avoid using test strips if the reagents show signs of improper storage.

Supplies For Testing Your Blood Glucose

 strategic von der biologischen Probe erworben werden. Die Blutprobe wird entnommen.

1. For non-diabetic patients.
2. DO NOT freeze. Keep out of direct sunlight and heat.
3. Consult with your healthcare professional before you test palm or forearm.
4. Extreme humidity may affect the results. A relative humidity greater than 60% may cause lower results.
5. DO NOT reuse the test strips. The test strips are intended for single use only.
6. DO NOT reuse the test strips. The test strips are intended for single use only.
7. Avoid using test strips if the reagents show signs of improper storage.

Testing Your Blood Glucose Level

1. Insert Test Strip. Insert a test strip into the meter. The meter will display “ADD STRIP.” 2. Press the start button. The meter will begin to measure the blood glucose level. 3. Press the stop button. The meter will display the result.

Testing Alternate Site (AST)

1. Insert Test Strip. Insert a test strip into the meter. The meter will display “ADD STRIP.” 2. Press the start button. The meter will begin to measure the blood glucose level. 3. Press the stop button. The meter will display the result.

CAUTION

1. DO NOT insert any substances other than the test strip into the meter.
2. DO NOT expose the test strip to direct sunlight or high temperature.
3. DO NOT use the test strip under any conditions that may affect the accuracy of the test.
4. DO NOT use the test strip if the reagents show signs of improper storage.
5. DO NOT use the test strip if the reagents show signs of improper storage.
6. DO NOT use the test strip if the reagents show signs of improper storage.

Reagent Composition

Warnings and Precautions

1. DO NOT use this test strip if the条纹 cannot be seen clearly.
2. DO NOT transfer the test strip to another bottle or container.
3. DO not use home-use blood glucose meters to test critically ill patients.
4. Extreme humidity may affect the results. A relative humidity greater than 60% may cause lower results.
5. DO NOT use the test strip if the reagents show signs of improper storage.
6. DO NOT use the test strip if the reagents show signs of improper storage.
7. Avoid using test strips if the reagents show signs of improper storage.
